Peak search

Sample name : P-1 File : Parati-4.RAW Measurement date : 10-Nov-03 16:48:58 Person who measured: Shigemi Fujinaga
 Comment : P-1 Memo : Powder reduced paratinose
 Method : secondary differential method Peak width threshold value : 0.060° Peak intensity threshold value : 23.00 cps

Peak No.	2θ	Half-value width	d value	Intensity	Relative intensity	Peak No.	2θ	Half-value width	d value	Intensity	Relative intensity
